

Terms and Conditions

Prices are in Pounds Sterling net, without engagement, exclusive of VAT and sales taxes and ex-works. Advanced Chemical Intermediates does its utmost to ensure prices stay current but reserve the right to change prices without prior notice. Written price quotations, when requested, are valid for 30 days.

All accounts are net cash within 30 days of receipt of goods. No discounts apply unless included in written quotation. Invoices are payable in full and no deductions can be made unless a credit note has previously been issued. Overseas buyers are responsible for their bank and clearance charges and no deductions for these are allowed. Title to goods shall remain with Advanced Chemical Intermediates and no property therein, whether legal or equitable shall pass to the customer until payment in full of the price and other charges has been received by us.

Orders, in principle, are shipped on the day received. Quotations from stock are subject to stock remaining unsold. If material requires synthesis or purchase, delivery times are issued on quotation. Quoted deliveries are subject to delivery of materials to Advanced Chemical Intermediates and successful synthesis.

If you have any special requirements, or you require written confirmation of your order, delivery at a special address or a consolidated delivery, please mention this clearly on your order. Any special packaging or special freight methods requested, or otherwise, will be subject to an additional charge, which will be added to the invoice.

Please contact our sales office before sending goods back to us. Advanced Chemical Intermediates will not accept returned goods without the prior authorisation of our sales department. Please request a 'returned goods form', which should be attached to the goods.

If you have placed an incorrect order or want to return products, we will require a 'returned goods fee' of 20% of the net value of the goods, with a minimum value of £15.00. Transport costs are also at your expense in this case. Under no circumstances should chemicals be posted.

Advanced Chemical Intermediates considers that its customers are suitably qualified to work with chemicals. Working with chemicals requires a responsible attitude from the user as well as from the purchaser. Advanced Chemical Intermediates cannot take responsibility for the application of our products. If you require specific product or safety information, please contact our sales office.

Specification change and reasonable variation from listed values should not form the basis of any dispute. We do not accept the return of any order where customers impose their own quality parameters unless these have been stipulated on the original order and agreed by Advanced Chemical Intermediates in writing.

All references to literature data, companies, researchers, patents or methods are given solely as information and as such Advanced Chemical Intermediates cannot be held responsible for the accuracy or otherwise of this information.

Advanced Chemical Intermediates considers that its customers will check their compliance with all legal obligations regarding the purchasing, importing, stocking and usage of all chemicals they order. Advanced Chemical Intermediates does not accept responsibility for these issues.

For certain chemicals we may ask the buyer to provide written confirmation that the chemical will neither be purchased nor resold for an improper use.

Please note that there may be local regulations in your country, that may influence the above written terms & conditions. Therefore, please contact your local distributor or Advanced Chemical Intermediates direct for more details.

Placement of a purchase order implies acceptance of these terms and conditions.
